

## Black Elderberry Extract

Cat. No. EXTM-007

Lot. No. (See product label)

### Introduction

#### Description

Black elderberry extract is a deep purple, fine powder produced from the fruits of *Sambucus nigra* L. (*Sambucus* genus, *Caprifoliaceae* family). Its main components are anthocyanins (25% content) and flavonoids (such as rutin and quercetin). This standardized extract is produced via a gentle water or water-alcohol co-extraction process designed to preserve bioactive anthocyanins. The product formulation is designed to provide a high concentration of polyphenols with proven immune-supporting and antioxidant activity. It is widely used in dietary supplements, immune-supporting syrups, functional beverages, and cold and flu formulations.

#### Applications

Food, beverages, fruit wines, health supplements, cosmetics, etc.

#### Synonyms

*Sambucus* *Sambucus nigra* L.

### Product Information

#### Source

The fruit of black elderberry (*Sambucus nigra* L.).

### Storage and Shipping Information

#### Storage

Store in a cool, dry place, tightly sealed and protected from light.
