

Black Goji Extract

Cat. No. EXTM-009

Lot. No. (See product label)

Introduction

Description

Black goji extract, sourced from high-altitude regions, undergoes extraction and processing to retain high levels of anthocyanins and polysaccharides. It offers powerful antioxidant, anti-aging, and eye-protecting benefits. The main components of black goji berry extract include anthocyanins, goji polysaccharides, flavonoids, vitamins, and minerals. Among these, anthocyanins are present in high concentrations and exhibit strong antioxidant activity. It is primarily used in high-end dietary supplements, functional foods, and skincare formulations targeting oxidative stress.

Applications

Food, beverages, fruit wines, health supplements, cosmetics, etc.

Synonyms

Lycium ruthenicum Murr

Product Information

Source

The fruit of Lycium ruthenicum Murr.

Storage and Shipping Information
