

Albizia Bark Extract

Cat. No. EXTM-014

Lot. No. (See product label)

Introduction

Description

Albizia bark extract is a brownish-yellow powder produced by extracting the dried bark of the Albizia tree (*Albizia julibrissin* Durazz.), a leguminous plant. It primarily contains albizin, saponins, tannins, and flavonoids, and is manufactured using a process involving heated reflux extraction and spray drying. This extract has the effects of relieving depression and calming the mind, as well as promoting blood circulation and reducing swelling. It is suitable for symptoms such as restlessness, lung abscesses, or swelling, and is commonly added to adaptogenic blends, mood-support supplements, and herbal sleep aids.

Applications

This extract has a sweet and neutral nature; it relieves depression and calms the mind, promotes blood circulation, and reduces swelling. It is suitable for treating symptoms such as restlessness and lung abscesses or swellings.
