

Dandelion Root Extract

Cat. No. EXTM-018

Lot. No. (See product label)

Introduction

Description

Dandelion root extract is a natural plant extract derived from the roots of the dandelion plant, primarily composed of flavonoids, terpenes, and polysaccharides. It helps maintain digestive health, supports liver function, and has mild diuretic properties. This extract is widely used in the pharmaceutical, dietary supplement, and cosmetics industries.

Applications

Medicinally, dandelion root extract is commonly used to support liver health, aid digestion, and act as a detoxifying diuretic. In the fields of health supplements and cosmetics, it can help with skin care, reduce inflammation, and provide antioxidant benefits.

Product Information

Source

Roots of the dandelion (*Taraxacum officinale*)

Appearance

Powdered or liquid, color ranges from dark brown to light brown.
