Reishi Spore Oil

Cat. No. EXTZ-787

Lot. No. (See product label)

Introduction

Description	Reishi spore oil is a lipid-like substance extracted from crushed reishi spores using supercritical carbon dioxide liquid extraction technology. Its main components include tonic acid, unsaturated fatty acids, and reishi polysaccharides. The extracted oil is a yellow, transparent liquid that exhibits anti-cerebral ischemia, anti-reperfusion injury, and antioxidant effects. This product can boost the body's immune system and alleviate mental disorders, loss of appetite, vomiting, hair loss, and other conditions caused by radiation and chemotherapy.

Product Information

Appearance	Translucent yellowish-white, viscous oil
