Ceratonia siliqua extract

Cat. No. EXTZ-790

Lot. No. (See product label)

Introduction

Description	Ceratonia siliqua extract is derived from the fruit of the carob tree (Ceratonia siliqua) and is rich in various chemical components, including fiber, polyphenols, sugars, proteins, and minerals. It is widely used in cosmetics. In skincare and cosmetics, it is primarily used as a moisturizer and skin conditioner. It is rich in polysaccharides and polyphenolic compounds, which effectively lock in moisture, strengthen the skin barrier, and reduce dryness and flaking. Additionally, this extract possesses antioxidant properties that neutralize free radicals, delay skin aging, and help soothe inflammation and irritation while improving skin texture. Commonly found in products such as face creams, lotions, and serums, it is suitable for all skin types and provides gentle care.
