# Sclerotium Gum

*Cat. No. EXTZ-795*

*Lot. No.* (See product label)

## Introduction

| | |
|---|---|
| ***Description*** | Sclerotium Gum is a natural microbial polysaccharide with excellent thickening, film-forming and skin conditioning properties, featuring outstanding application value in skincare. This product is specially hydrolyzed and modified to greatly enhance water solubility, enabling it to dissolve quickly and uniformly in water. It delivers excellent moisturizing and antioxidant effects, helping repair skin condition and refine skin texture.It is compatible with a wide range of formulations, and can be used in toners, gels, essences, lotions and creams as well as other skincare systems. |
