Creative Enzymes®

Auxins

Cat. No. EXTZ-801

Lot. No. (See product label)

Introduction

Description	Auxins are a class of essential plant hormones that regulate cell elongation, root initiation, apical dominance and tropic responses. This product encompasses natural and synthetic auxin compounds including indole-3-acetic acid (IAA) and related derivatives. Auxins play critical roles in promoting rooting, fruit development and vascular tissue differentiation, and are widely used in agriculture, horticulture and plant tissue culture to enhance rooting of cuttings, regulate plant growth patterns and improve crop productivity.

Product Information

Form	White to off-white powder

Storage and Shipping Information

Storage	Store in cool, dry place
