

Phospholipid Complex from sunflower

Cat. No. EXTZ-804

Lot. No. (See product label)

Introduction

Description

Phospholipid Complex from sunflower is a non-GMO, non-allergenic phospholipid preparation derived from sunflower (*Helianthus annuus*) seeds. As an excellent alternative to soy-based phospholipids, it contains a balanced complex of phosphatidylcholine, phosphatidylethanolamine, phosphatidylinositol and other phospholipid fractions. This product offers superior emulsification properties and bioavailability, making it ideal for pharmaceutical formulations, nutritional supplements, cosmetics and functional food applications where soy-free labeling is required.

Product Information

Species Helianthus annuus

Source Sunflower seed

Form Powder

Storage and Shipping Information

Storage Store in cool, dry place; protect from light and oxidation
