

Dextran sucrose

Cat. No. DSGZ-0001

Lot. No. (See product label)

Introduction

Description

Dextran sucrose is an extracellular glucosyltransferase that catalyzes the transfer of D-glucopyranosyl residues from sucrose to dextran.

Product Information

CAS No.

9032-14-8

Specificity

Transfers D-glucopyranosyl residues from sucrose to dextran.

Function

Catalyzes glucosyl transfer from sucrose to dextran.

Substrates

Sucrose; dextran

Reaction

D-glucopyranosyl residues are transferred from sucrose to dextran.

Usage and Packaging

Package

10 U

Storage and Shipping Information

Shipping Conditions

Room temperature
