

Food Grade Collagen Tripeptide

Cat. No. FGCT-001

Lot. No. (See product label)

Introduction

Description

Food Grade Collagen Tripeptide is a low-molecular-weight collagen-derived tripeptide prepared from animal collagen sources such as pig skin or fish skin and composed of three amino acid residues.

Applications

Food formulations, including nutritional foods and use as an ingredient in meat products, frozen foods, and dairy products.

Product Information

Source

Pig skin; fish skin

Molecular Weight

Average 280 Da

Structure

Gly-X-Y

Composition

Glycine, proline or hydroxyproline, and one additional amino acid residue.

Grade

Food Grade
