Glycylglycine

Cat. No. GLGZ-0001

Lot. No. (See product label)

Introduction

Description	Glycylglycine is the simplest peptide and can act as an acceptor for gamma-glutamyl groups.
Applications	Biological research; blood preservation; stabilization of aqueous cytochrome c preparations.

Product Information

Appearance	White crystals
CAS No.	556-50-3
Molecular Formula	$C_4H_8N_2O_3$
Molecular Weight	132.12 g/mol
Purity	98%
Melting Point	220–240 °C
Solubility	Soluble in water
Grade	Biochemical reagent (BR)
Notes	Hygroscopic.

Usage and Packaging

Package	5 g 25 g 100 g 500 g

Storage and Shipping Information

Storage	Room temperature
