

Magnesium sulfate anhydrous

Cat. No. MSAG-0001

Lot. No. (See product label)

Introduction

Description	Magnesium sulfate anhydrous is an inorganic magnesium salt supplied at analytical-reagent grade with a stated purity of 98%.
Applications	General laboratory reagent.
Synonyms	Anhydrous magnesium sulfate

Product Information

CAS No.	7487-88-9
Molecular Formula	MgSO ₄
Chemical Name	Magnesium sulfate
Molecular Weight	120.37 g/mol
Purity	98%
Quality	Anhydrous grade
Grade	AR

Usage and Packaging

Package	500 g
----------------	-------

Storage and Shipping Information

Storage	Room temperature
----------------	------------------
