

Coconut Shell Powdered Activated Carbon

Cat. No. PACG-001

Lot. No. (See product label)

Introduction

Description

A high-activity adsorbent produced from coconut shell and supplied in powdered form. Its developed pore structure supports efficient liquid-phase decolorization and purification.

Applications

Decolorization and purification Food and beverage refining Water purification

Product Information

Source

Coconut shell

Form

Powder

Composition

Activated carbon derived from coconut shell

Function

Adsorption of color-causing substances and other impurities from liquid streams.

Quality

Particle size: 93 mesh Iodine value: >1000 mg/g
