

Peginterferon alfa-2a

Cat. No. PAG-001

Lot. No. (See product label)

Introduction

Description	Peginterferon alfa-2a is an interferon alfa-2a protein modified by conjugation with pegol.
Applications	Suitable for research on chronic hepatitis C virus and hepatitis B virus infection.

Product Information

CAS No.	198153-51-4
Structure	PEG-modified interferon alfa-2a
Composition	Interferon alfa-2a conjugated with pegol.
Targets	IFNAR

Usage and Packaging

Package	135 µg
Reconstitution	Reconstitute or dilute with sterile PBS or saline.

Storage and Shipping Information

Storage	Store under the recommended conditions specified in the lot-specific Certificate of Analysis.
