Panax Ginseng Root Exosome Extract

Cat. No. PGEG-0001

Lot. No. (See product label)

Introduction

Description	Panax Ginseng Root Exosome Extract is a liquid botanical ingredient containing nanoscale extracellular vesicles derived from Panax ginseng roots.
Applications	Serums, essences, ampoules, masks, creams, lotions, and other cosmetic formulations.
Synonyms	Ginseng Root Exosome Extract; Panax Ginseng Root Extracellular Vesicle Extract; Ginseng Root EV Extract

Product Information

Species	Panax ginseng
Source	Panax ginseng root-derived extracellular vesicles
Appearance	Liquid
Form	Liquid
Structure	Nanoscale extracellular vesicles with a lipid-bilayer structure.
Composition	Liquid dispersion containing Panax ginseng root-derived extracellular vesicles.
Function	Plant-derived extracellular-vesicle ingredient for cosmetic formulation.
Quality	Vesicle count: ≥1.0×10^{11} particles/mL Particle size: ≤150 nm
Advantages	High vesicle concentration Nanoscale particle specification Liquid form for formulation development
Usage	For use as a botanical ingredient in compatible cosmetic formulations.
