

Bis-Ethoxydiglycol Azelate Dicarboxylate

Cat. No. CEGZ-6114

Lot. No. (See product label)

Introduction

Description

Bis-Ethoxydiglycol Azelate Dicarboxylate is an azelaic-acid-derived diester supplied as a colorless to pale yellow liquid with a characteristic odor.

Applications

Cosmetic and personal-care formulations where a polyol-compatible penetration-enhancing ingredient is desired.

Product Information

Appearance

Colorless to pale yellow liquid

Form

Liquid

CAS No.

1115183-98-6

Chemical Name

3,6-Dioxaoct-1-yl 9-(3,6-dioxaoct-1-yloxy)-9-oxononanoate

Purity

≥95% (HPLC)

Solubility

Soluble in polyols

Notes

Odor: Characteristic

Usage

0.2%-2.0%
