

Soybean Oligosaccharide-Peptide Powder

Cat. No. CEGZ-6118

Lot. No. (See product label)

Introduction

Description

Soybean Oligosaccharide-Peptide Powder is produced from soybean meal by enzymatic hydrolysis and is supplied as a pale-yellow powder.

Applications

Powdered beverages; compressed confectionery tablets; liquid beverages.

Product Information

Source

Soybean meal

Appearance

Pale-yellow powder

Form

Powder

Thermal stability

Stable during short-term treatment at 100°C.

Composition

Soybean oligosaccharides: 20% Soybean oligopeptides: 60%

Solubility

Readily soluble in water

Notes

Shelf life: 24 months.

Usage and Packaging

Package

1 kg aluminum foil bag
