Creative Enzymes®

Chondroitin Sulfate Oligosaccharide, 800-2,000 Da

Cat. No. CEGZ-6225

Lot. No. (See product label)

Introduction

Description	Low-molecular-weight chondroitin sulfate oligosaccharide is a depolymerized chondroitin sulfate material with a defined molecular-weight distribution. Its smaller saccharide fragments provide a distinct raw-material form for formulation and biochemical research.
Applications	Cosmetic and personal-care formulation research; biochemical and glycosaminoglycan studies; raw-material development.

Product Information

Molecular Weight	800-2,000 Da
Purity	≥95.0% (HPLC)
Function	Joint-support; soothing; anti-hair-loss related functionality.
