

Chondroitin Sulfate Oligosaccharide, 800-2,000 Da

Cat. No. CEGZ-6225

Lot. No. (See product label)

Introduction

Description

A low-molecular-weight chondroitin sulfate oligosaccharide produced using biotechnology and is described as having enhanced bioactivity relative to conventional chondroitin sulfate.

Applications

Used in oral and topical formulation development; Key characteristics include joint-support, soothing, and anti-hair-loss related applications.

Product Information

Molecular Weight

800-2,000 Da

Purity

≥95.0% (HPLC)

Function

Joint-support; soothing; anti-hair-loss related functionality.
