Low-Molecular-Weight Sodium Polyglutamate

Cat. No. CEGZ-6227

Lot. No. (See product label)

Introduction

Description	A low-molecular-weight sodium polyglutamate described as a naturally derived polymer with water-retention and free-radical-scavenging properties.
Applications	Used in moisturizing, soothing, and brightening-oriented cosmetic formulations.

Product Information

Molecular Weight	100-300 Da
Purity	≥98.0% (HPLC)
Function	Moisturizing; soothing; brightening-related functionality.
