Sarcosine Amino Acid Derivative

Cat. No. CEGZ-6248

Lot. No. (See product label)

Introduction

Description	Sarcosine is an N-methylated amino acid derivative supplied as a biochemical raw material.
Applications	Biochemical reagent applications; dye-stabilizer formulations; daily chemical formulations; surfactant-related formulations; health-product formulation development.
Synonyms	N-Methylglycine; N-methylaminoacetic acid

Product Information

CAS No.	107-97-1
Molecular Formula	C3H7NO2
Chemical Name	Sarcosine
Molecular Weight	89.0932
Notes	EINECS: 203-538-6.
