Creatinine Analytical Raw Material

Cat. No. CEGZ-6253

Lot. No. (See product label)

Introduction

Description	Creatinine is a small nitrogen-containing cyclic compound supplied as an analytical and formulation raw material.
Applications	Applications include blood-test analytical reagents and health-product formulations.

Product Information

CAS No.	60-27-5
Molecular Formula	C4H7N3O
Chemical Name	Creatinine
Molecular Weight	113.12
Notes	EINECS: 200-466-7.
