D-Tryptophan Chiral Amino Acid

Cat. No. CEGZ-6265

Lot. No. (See product label)

Introduction

Description	D-tryptophan is the D-enantiomer of tryptophan supplied as a chiral aromatic amino acid raw material.
Applications	This material is a nutritional agent and for pharmaceutical formulation applications related to pellagra prevention and treatment.
Synonyms	H-D-Trp-OH; D-(+)-Tryptophan

Product Information

CAS No.	153-94-6
Molecular Formula	C11H12N2O2
Chemical Name	D-(+)-Tryptophan
Molecular Weight	204.23
Notes	EINECS: 205-819-9.
