

D-Tryptophan Chiral Amino Acid

Cat. No. CEGZ-6265

Lot. No. (See product label)

Introduction

Description

D-tryptophan is the D-enantiomer of tryptophan supplied as a chiral aromatic amino acid raw material.

Applications

This material is a nutritional agent and for pharmaceutical formulation applications related to pellagra prevention and treatment.

Synonyms

H-D-Trp-OH; D-(+)-Tryptophan

Product Information

CAS No.

153-94-6

Molecular Formula

C₁₁H₁₂N₂O₂

Chemical Name

D-(+)-Tryptophan

Molecular Weight

204.23

Notes

EINECS: 205-819-9.
