D-Proline Chiral Amino Acid

Cat. No. CEGZ-6267

Lot. No. (See product label)

Introduction

Description	D-proline is the D-enantiomer of proline supplied as a chiral cyclic amino acid raw material.
Applications	Applications include pharmaceutical synthesis applications.
Synonyms	D-Pyrrolidine-2-carboxylic acid

Product Information

CAS No.	344-25-2
Molecular Formula	C5H9NO2
Chemical Name	D-Proline
Molecular Weight	115.13
Notes	EINECS: 206-452-7.
