Carboxymethylcysteine Amino Acid Derivative

Cat. No. CEGZ-6280

Lot. No. (See product label)

Introduction

Description	Carboxymethylcysteine is a sulfur-containing cysteine derivative supplied as a small-molecule amino acid material.
Applications	Applications include formulations for conditions associated with viscous sputum, difficult expectoration, and airway obstruction, including chronic bronchitis and bronchial asthma.
Synonyms	S-Carboxymethyl-L-cysteine

Product Information

CAS No.	638-23-3
Molecular Formula	C5H9NO4S
Chemical Name	Carboxymethylcysteine
Molecular Weight	179.1943
Notes	EINECS: 211-327-5.
