DL-Malic Acid Racemic Material

Cat. No. CEGZ-6287

Lot. No. (See product label)

Introduction

Description	DL-malic acid is the racemic form of malic acid supplied as a dicarboxylic acid raw material.
Applications	Food-industry applications include an acidulant, color-retention agent, preservative, and emulsion stabilizer for egg yolk, as well as pharmaceutical use.
Synonyms	DL-Hydroxybutanedioic acid

Product Information

CAS No.	617-48-1
Molecular Formula	C4H6O5
Chemical Name	DL-Malic acid
Molecular Weight	134.08864
Notes	EINECS: 210-514-9.
