DL-Methionine Racemic Amino Acid

Cat. No. CEGZ-6293

Lot. No. (See product label)

Introduction

Description	DL-methionine is the racemic form of methionine supplied as a sulfur-containing amino acid material.
Applications	Applications include use as a biochemical reagent.
Synonyms	DL-2-Amino-4-methylthiobutyric acid; DL-Methionine

Product Information

CAS No.	59-51-8
Molecular Formula	C5H11NO2S
Chemical Name	DL-Methionine
Molecular Weight	149.21
Notes	EINECS: 200-432-1.
