DL-Alanine Racemic Amino Acid

Cat. No. CEGZ-6306

Lot. No. (See product label)

Introduction

Description	DL-alanine is the racemic form of alanine supplied as an amino acid and biochemical raw material.
Applications	Applications include use as a food flavoring, nutritional fortifier, vitamin B6 intermediate, feed additive, and biochemical reagent.
Synonyms	DL-2-Aminopropionic acid; DL-Alanine

Product Information

CAS No.	302-72-7
Molecular Formula	C3H7NO2
Chemical Name	DL-Alanine
Molecular Weight	89.0940
Notes	EINECS: 206-126-4.
