N-Acetyl-DL-Methionine Racemic Derivative

Cat. No. CEGZ-6311

Lot. No. (See product label)

Introduction

Description	N-acetyl-DL-methionine is an acetylated racemic methionine derivative supplied as a sulfur-containing amino acid material.
Applications	Applications include biochemical research.
Synonyms	N-Acetyl-DL-methionine; Ac-DL-Met-OH

Product Information

CAS No.	1115-47-5
Molecular Formula	C7H13NO3S
Chemical Name	N-Acetyl-DL-methionine
Molecular Weight	191.25
Notes	EINECS: 214-224-3.
