

N-Acetyl-L-Methionine Amino Acid Derivative

Cat. No. CEGZ-6313

Lot. No. (See product label)

Introduction

Description N-acetyl-L-methionine is an acetylated sulfur-containing amino acid derivative supplied as a small-molecule raw material.

Synonyms N-Acetyl-L-methionine; Acetylmethionine

Product Information

CAS No. 65-82-7

Molecular Formula C7H12NO3S

Chemical Name N-Acetylmethionine

Molecular Weight 190.2406

Notes EINECS: 200-617-7.
