DL-Homocysteine Thiolactone Hydrochloride

Cat. No. CEGZ-6314

Lot. No. (See product label)

Introduction

Description	DL-homocysteine thiolactone hydrochloride is a cyclic sulfur-containing amino acid derivative supplied as an intermediate material.
Applications	Applications include use as a pharmaceutical intermediate.
Synonyms	DL-Homocysteine thiolactone hydrochloride

Product Information

CAS No.	6038-19-3
Molecular Formula	C4H8ClNOS
Chemical Name	DL-Homocysteine thiolactone hydrochloride
Molecular Weight	153.6304
Notes	EINECS: 227-923-3.
