Liquid Maltitol Sugar Alcohol

Cat. No. CEGZ-6323

Lot. No. (See product label)

Introduction

Description	Liquid maltitol is a polyol product prepared from high-quality starch through hydrolysis, hydrogenation, and related refining processes.
Applications	Suitable for food, pharmaceutical formulation, cosmetic and personal-care formulation, and related industrial applications where a sweet-tasting polyol or humectant is required.

Product Information

Appearance	Clear, transparent, neutral viscous liquid.
Form	Viscous liquid
Function	Provides sweetness and can also serve as a moisture-retaining polyol in formulations.

Usage and Packaging

Package	24 kg steel drum; 300 kg plastic drum; customizable packaging.
