High-Sulfation Leather Fatliquoring Agent

Cat. No. CEGZ-6350

Lot. No. (See product label)

Introduction

Description	An environmentally oriented leather fatliquoring agent designed to improve grain compactness, dyeing uniformity, and leather fullness while providing controlled lubrication during leather processing.
Applications	Suitable for shoe upper leather, suede, reverse-suede leather, and double-layer leather.

Product Information

Appearance	Brown-yellow liquid.
Form	Liquid
Composition	Leather fatliquoring formulation.
Quality	Active matter: >=46%. pH (10% solution): 4 +/- 1.
Usage	Recommended dosage: 3-4%. Do not use together with substances to which the product is unstable.

Usage and Packaging

Package	125 kg plastic drum.

Storage and Shipping Information

Storage	Store in a cool, dry place. Shelf life: 2 years.
Stability	Stable within acidic and mildly alkaline pH ranges; unstable toward gel-forming substances.
Shipping Conditions	Non-hazardous; may be transported as general cargo.
