Eco-Friendly Anionic Leather Fatliquor

Cat. No. CEGZ-6368

Lot. No. (See product label)

Introduction

Description	An environmentally oriented anionic fatliquor with good penetration, lightfastness, fixation, and dispersing performance.
Applications	Suitable for light leather fatliquoring, especially white leather, pale leather, garment leather, and suede leather.

Product Information

Appearance	White paste.
Form	Paste
Composition	Synthetic oil blend.
Quality	Solid content: >=30%. pH (10% solution): 3.5 +/- 1. Charge: anionic.
Usage	Can be used as a surface oil, after pickling fatliquoring, and for reverse-suede dyeing. Do not use in the same bath with cationic materials. Recommended dosage: 0.5-2.0%.

Usage and Packaging

Package	100 kg plastic drum.

Storage and Shipping Information

Storage	Store in a cool, dry place. Shelf life: 6 months.
Shipping Conditions	Non-hazardous; may be transported as general cargo.
