Nonionic Leather Degreasing Agent

Cat. No. CEGZ-6369

Lot. No. (See product label)

Introduction

Description	A nonionic surfactant-based degreasing auxiliary developed for leather processing with high degreasing efficiency and low foaming behavior.
Applications	Suitable for soaking, liming, main degreasing, bating, and pickling processes. It may also be used during soaking and pre-retanning degreasing to assist rewetting and penetration and promote uniform dyeing.

Product Information

Appearance	Colorless transparent liquid.
Form	Liquid
Composition	Nonionic surfactant and auxiliaries.
Quality	Active matter: >=30%. pH (10% solution): 7 +/- 1. Charge: nonionic.
Usage	Recommended dosage: 1-2% for main degreasing; 0.3-1% for other processes.

Usage and Packaging

Package	125 kg or 200 kg plastic drum.

Storage and Shipping Information

Storage	Store in a cool, dry place. Shelf life: 6 months.
Stability	Stable to acids, alkalis, and salts.
Shipping Conditions	Non-hazardous; may be transported as general cargo.
