Menadione Sodium Bisulfite Feed Additive

Cat. No. CEGZ-6382

Lot. No. (See product label)

Introduction

Description	A water-soluble vitamin K3 derivative supplied as menadione sodium bisulfite for feed formulation.
Applications	Used as a vitamin K3 source in feed formulations.

Product Information

Appearance	White crystalline powder.
Form	Powder
CAS No.	130-37-0
Composition	Menadione sodium bisulfite (MSB).
Melting Point	121-124°C
Solubility	Readily soluble in water.
Quality	MSB 99: menadione content >=51.5%. MSB 98: menadione content >=51.05%. MSB 96: menadione content >=50.0%. MSB 95: menadione content >=33.9%.
Usage	Recommended addition: 3-12 g per metric ton of feed.

Storage and Shipping Information

Shipping Conditions	Non-hazardous; may be transported as general cargo.
