Oxidized Glutathione Redox Disulfide

Cat. No. CEGZ-6453

Lot. No. (See product label)

Introduction

Description	Oxidized glutathione is the disulfide form generated by oxidation of two reduced-glutathione molecules and is represented by the GSSG redox state.
Applications	GSH/GSSG redox assays; antioxidant and oxidative-stress research; cosmetic and pharmaceutical formulation research.
Synonyms	Glutathione disulfide

Product Information

CAS No.	27025-41-8
Molecular Formula	$C_{20}H_{32}N_6O_{12}S_2$
Chemical Name	L-Glutathione, oxidized
