Creative Enzymes®

Low-Molecular-Weight Eisenia fetida Peptides

Cat. No. CEGZ-6461

Lot. No. (See product label)

Introduction

Description	Low-Molecular-Weight Eisenia fetida Peptides are refined enzymatic hydrolysates containing at least 60% protein and at least 50% peptides below 1 kDa.
Applications	Circulation-health nutrition Microcirculation-management formulations Sports-recovery nutrition Conventional foods and dietary supplements

Product Information

Species	Eisenia fetida
Source	Enzymatically hydrolyzed earthworm protein
Appearance	White to pale-yellow powder
Form	Powder
Molecular Weight	Peptide fraction: <1 kDa
Composition	Protein: ≥60% Peptides below 1 kDa: ≥50%
Function	Circulation and recovery nutrition support
Grade	Food and dietary-supplement formulation grade
