Creative Enzymes®

High-Purity Methylprednisolone Acetate

Cat. No. CEGZ-6466

Lot. No. (See product label)

Introduction

Description	High-Purity Methylprednisolone Acetate is a white to off-white crystalline powder with an assay of 98.0–102.0% and chromatographic purity of at least 98.8%.
Applications	Pharmaceutical-intermediate development Steroid analytical and quality-control studies

Product Information

Appearance	White to off-white crystalline powder
Form	Crystalline powder
Molecular Weight	386.53
Purity	Assay: 98.0–102.0% Chromatographic purity: ≥98.8%
Impurities	Total impurities: ≤1.2% Number of impurities: <4 Largest single impurity: ≤0.8%
Quality	Infrared spectrum corresponds to the reference standard. Conforms to applicable compendial requirements.
Grade	Pharmaceutical-intermediate grade
