High-Purity Salmon-Derived Sodium DNA

Cat. No. CEGZ-6468

Lot. No. (See product label)

Introduction

Description	High-Purity Salmon-Derived Sodium DNA consists of 100–1,000 bp DNA fragments with a dry-basis assay of at least 99%.
Applications	Skin-vitality formulations Skin-condition maintenance Environmental-stress protection Premium restorative skincare products

Product Information

Source	Salmon milt-derived DNA fragments
Appearance	White, off-white, or slightly yellow powder or fibrous solid
Form	Powder or fibrous solid
CAS No.	100403-24-5
Molecular Weight	DNA fragment size: 100–1,000 bp
Purity	≥99% on a dry basis
Function	Skin conditioning and environmental-stress care
Grade	Cosmetic formulation grade
