Ultra-Low-Molecular-Weight Hydrolyzed Hyaluronic Acid

Cat. No. CEGZ-6469

Lot. No. (See product label)

Introduction

Description	Ultra-Low-Molecular-Weight Hydrolyzed Hyaluronic Acid is a purified hyaluronic acid oligosaccharide with an average molecular weight below 900 Da and a specification limit below 1 kDa.
Applications	Deep-hydration skincare Firming formulations Barrier-care products High-activity cosmetic formulations

Product Information

Appearance	White to off-white granules or powder
Form	Granules or powder
CAS No.	9067-32-7
Molecular Weight	Average molecular weight: <900 Da Specification limit: <1 kDa
Purity	≥95%
Composition	Glucuronic acid: ≥43%
Function	Hydration, firming, and skin-barrier care
Grade	Cosmetic formulation grade
