

Cationic Hydroxypropyltrimonium Hyaluronate

Cat. No. CEGZ-6471

Lot. No. (See product label)

Introduction

Description

Cationic Hydroxypropyltrimonium Hyaluronate is a 1 kDa positively charged hyaluronate derivative standardized to at least 43% glucuronic acid.

Applications

Moisturizing skincare Hair-smoothing formulations Dry-skin cleansing products Skin and hair conditioning

Product Information

Appearance

White, off-white, or pale-yellow powder or granules

Form

Powder or granules

CAS No.

1714127-68-0

Molecular Weight

1 kDa

Composition

Glucuronic acid: $\geq 43\%$

Function

Skin and hair moisturization and conditioning

Grade

Cosmetic formulation grade

Advantages

Positive charge improves affinity for skin and hair.
