Creative Enzymes®

Low-Endotoxin Sodium Hyaluronate

Cat. No. CEGZ-6473

Lot. No. (See product label)

Introduction

Description	Low-Endotoxin Sodium Hyaluronate is a customizable-molecular-weight powder with at least 90% purity, endotoxin below 0.25 EU/mg, and protein not exceeding 0.05%.
Applications	Injectable aesthetic formulation development Excimer-laser-related formulation research Premium medical-aesthetic formulations Advanced cosmetic and skincare research

Product Information

Appearance	White to off-white powder
Form	Powder
CAS No.	9067-32-7
Molecular Weight	Customizable average molecular weight
Purity	≥90%
Impurities	Protein: ≤0.05%
Composition	Glucuronic acid: ≥43%
Endotoxin Level	<0.25 EU/mg
Quality	Low-endotoxin specification
Grade	Pharmaceutical carrier grade
