Sodium Hyaluronate Crosspolymer Gel

Cat. No. CEGZ-6474

Lot. No. (See product label)

Introduction

Description	Sodium Hyaluronate Crosspolymer Gel is a colorless transparent crosslinked hyaluronate material with a dynamic viscosity of at least 360,000 mPa·s at 25 °C.
Applications	Injectable medical-aesthetic formulation development Medical-dressing research Professional beauty formulations Premium and functional skincare

Product Information

Appearance	Colorless transparent gel
Form	Gel
CAS No.	105524-32-1
Structure	Single-crosslinked variant Double-crosslinked variant Reverse-crosslinked variant
Quality	Dynamic viscosity at 25 °C: ≥360,000 mPa·s
Grade	Pharmaceutical carrier grade
