Creative Enzymes®

Low-Molecular-Weight Sodium Chondroitin Sulfate

Cat. No. CEGZ-6477

Lot. No. (See product label)

Introduction

Description	Low-Molecular-Weight Sodium Chondroitin Sulfate is an enzymatically hydrolyzed glycosaminoglycan with an average molecular weight of 500–1,000 Da and an assay of at least 90%.
Applications	Moisturizing skincare Firming formulations Soothing products Anti-aging cosmetic systems

Product Information

Appearance	Pale-yellow to yellow powder
Form	Powder
CAS No.	9082-07-9
Molecular Weight	Average molecular weight: 500–1,000 Da
Purity	Assay: ≥90%
Function	Moisturizing, firming, soothing, and anti-aging care
Grade	Cosmetic formulation grade
