Retatrutide Multi-Receptor Research Peptide

Cat. No. CEGZ-6486

Lot. No. (See product label)

Introduction

Description	Retatrutide Multi-Receptor Research Peptide is a synthetic peptide supplied at 99% purity for receptor-signaling investigations.
Applications	GLP-1, GIP, and glucagon receptor signaling studies Incretin and metabolic pathway research Peptide characterization Purity and analytical method development

Product Information

CAS No.	2381089-83-2
Purity	99%
Structure	Synthetic multi-receptor peptide
Pathway	Incretin and glucagon receptor signaling
Function	Multi-receptor agonist-related research
Targets	GLP-1 receptor; GIP receptor; glucagon receptor
Grade	Research grade
Usage	For laboratory research only.
