

## Orforglipron Non-Peptide GLP-1 Agonist

Cat. No. CEGZ-6487

Lot. No. (See product label)

### Introduction

#### Description

Orforglipron Non-Peptide GLP-1 Agonist is a structurally defined small-molecule research compound supplied at 99% purity.

#### Applications

GLP-1 receptor activity and ligand-binding research Non-peptide ligand design  
Small-molecule drug chemistry Structure confirmation and analytical method development

### Product Information

|                          |                                                                               |
|--------------------------|-------------------------------------------------------------------------------|
| <b>CAS No.</b>           | 2212020-52-3                                                                  |
| <b>Molecular Formula</b> | C <sub>48</sub> H <sub>48</sub> F <sub>2</sub> N <sub>10</sub> O <sub>5</sub> |
| <b>Molecular Weight</b>  | 883.0                                                                         |
| <b>Purity</b>            | 99%                                                                           |
| <b>Structure</b>         | Non-peptide small molecule                                                    |
| <b>Pathway</b>           | GLP-1 receptor signaling                                                      |
| <b>Function</b>          | GLP-1 receptor agonist-related research                                       |
| <b>Targets</b>           | Glucagon-like peptide-1 receptor (GLP-1R)                                     |
| <b>Grade</b>             | Research grade                                                                |
| <b>Usage</b>             | For laboratory research only.                                                 |
