Fmoc-L-Glu(OtBu)-Gly-Gly

Cat. No. CEGZ-6488

Lot. No. (See product label)

Introduction

Description	Fmoc-L-Glu(OtBu)-Gly-Gly is an N-terminally Fmoc-protected tripeptide fragment with tert-butyl protection on the glutamic acid side chain, supplied at 99% purity.
Applications	Solid-phase peptide synthesis Protected peptide fragment assembly Coupling and deprotection optimization Peptide process and analytical research

Product Information

Purity	99%
Structure	Fmoc- and tert-butyl-protected tripeptide
Composition	Fmoc-L-Glu(OtBu)-Gly-Gly
Function	Protected peptide synthesis intermediate
Grade	Peptide synthesis grade
Usage	For peptide synthesis and laboratory research.
